

### Sewer Metering Program:

If you are a user of the City of Tiffin's sewer system, but have a well - you can install at your cost, a water meter to get an exact bill for the your usage, which may or may not save you money, instead of being billed a flat rate which is the national average cost. There is a form to fill out for meter installation that must be signed by the owner, once the meter is installed call the wastewater plant and we will come out and ensure it's working properly and get an initial read to report to the sewer revenue office.

For additional information, please contact 419-448-5440.
